

pgAdmin4 Steps

1. **Create the database:** MSUDA-project-ETL-crowdfunding
2. **Create the tables:** Open and run part2.3-schema.sql
3. **Import the data:** Right click each table, in the order of creation, and import the data from resources/output (make sure Header is selected in Options)

- **ERROR IMPORTING THE DATA?**

- Check which table is empty, you need to fill that one first
