

## **pgAdmin4 Steps**

1. **Create the database:** MSUDA-project-ETL-crowdfunding
  2. **Create the tables:** Open and run part2.3-schema.sql
  3. **Import the data:** Right click each table, in the order of creation, and import the data from resources/output/csv-files
    - a. Make sure Options>Header is selected
    - b. Make sure Columns>last\_updated is removed
- **ERROR IMPORTING THE DATA?**
    - Check which table is empty, you need to fill that one first
